## VOLUNTEERING EXPERIENCE

---

### **MovieFlix App**

Developed a web application that provide users with access to information about different movies, directors, and genres. Users will be able to sign up, update their personal information, and create a list of their favorite movies.

- Server-Side component is designed using Node.js and Express.js with help of Mongodb.
- The web application has its own REST API.
- Client-side is designed using React.js
- Business-logic and Authentication are taken greatly into account.

## **Pokédex App**

A small web application with HTML, CSS, and JavaScript that loads data from an external API and enables the viewing of data points in detail.

- Users are able to view a list of data and more details for a given data item on demand.
- Data is loaded from an external API.
- App also allows searching data.

## **DIGITAL SKILLS**

---

### **My Digital Skills**
